KEYNOTE SPEAKER

Dr. Wayne Fuqua

Wayne Fuqua (Ph.D., BCBA-D) is a Professor of Psychology at Western Michigan University where he served as the Chair of that Department for 14 years. Dr. Fuqua's research and scholarly interests span a range of topics including autism, health psychology, gerontology, evidence-based practice, dissemination of behavior analysis, ethics, and behavioral approaches to sustainability and climate change. His contributions have been recognized with several appointment and awards including: election as a Fellow for the Association of Behavior Analysis; a Distinguished Service Award at WMU; the Jacobson Award from New York State ABA; and a term on the Michigan Autism Council. He has produced a series of training videos that feature interviews and demonstrations with leaders in behavior analysis.

Evidence-based Practice in ABA: Detecting and Troubleshooting Treatment Failures

Abstract: Evidence-based practice (EBP) is a multi-component process in which practitioners select, refine and deliver clinical services based on a) the best available scientific evidence, b) unique client and contextual features, c) training and competence of the practitioner, d) ongoing clinical progress monitoring and decision making and e) early detection and trouble-shooting of treatment "failures."
